## We've put every advanced feature that makes Roland printer/cutters awesome into one epic package.

Roland's fastest, most powerful large-format color printer/cutter ever, the 64-inch SOLJET Pro 4 XR-640 ushers in a new era of quality, precision and performance. The heart of the Pro 4 is its new print engine. Incorporating the latest in inkjet technology, it features two inline 8-channel piezo inkjet heads with 180 nozzles per channel, capable of printing seven different droplet sizes for smoother gradations and richer density in photographic and high-resolution vector output. The mirrored configuration of the print heads virtually eliminates chromatic banding, even in bi-directional printing modes.

And that's just the beginning. Integrated printing and contour-cutting streamlines the production process. The Pro 4's 64 inch width is ideal for vehicle wraps and other large applications. Our new high-density Eco-Sol MAX 2 inks deliver a wider gamut and unsurpassed image quality at all speeds. And powerful VersaWorks™ RIP software is included, taking full advantage of the Pro 4's capabilities with a host of new features including a Predictive Ink Calculator, Spot Color Replacement Tool, and Built-in Pantone® Spot Color Library. The final results are consistent, efficient performance and the best prints ever produced on any Roland device. It's Production. Perfected.

### New Higher Density Eco-SOL MAX 2 Inks with Light Black, White and Metallic

The Pro 4 is the first device to use Roland's new, high-definition Eco-Sol MAX 2 inks. And they've taken production quality to a new level. Environmentally friendly and virtually odorless, nickel-free MAX 2 inks are specially designed to deliver a wider color gamut with superb detail in the highlights and smoother blends. Combined with our new print heads and smaller droplets, higher density MAX 2 inks produce better ink coverage and more vibrant color at faster speeds.

With MAX 2 inks and the Pro 4, you have your choice of an array of specialty inks that add value to any graphic. Our new Light Black ink delivers more neutral grays, smoother gradients and more natural skin tones. Higher density White ink allows for greater opacity and makes graphics pop off of clear media. A new formulation of Metallic Silver provides more brilliant output and can be printed as a pure spot color or combined with CMYK to produce over 500 striking metallic and pearlescent colors. Our new White and Silver inks can also now be printed at speeds up to twice as fast as before.

### Two-Year Trouble-Free Warranty Gold Edition

As with all Rolands, the Pro 4 offers years of reliable service, even in the most demanding shop environments. As further proof of our unparalleled reliability, the Pro 4 is backed by a warranty you won't find anywhere else in the industry. The Gold Edition Warranty covers all labor and most parts\*. In addition to two years of no-cost service and repair, the Gold Edition Warranty provides two scheduled preventative maintenance visits by an authorized Roland dealer including a full 20-point checklist and the replacement of most wear items.

“When we were developing our company, the versatility of our Roland printers was a huge advantage. As we've expanded, we've continued to choose Roland printers because of their extraordinary performance and up-to-the-minute technology.”

Paige Zeigler, Co-owner, Off The Wall Signs in Las Vegas, NV

#### New Light Black Ink

Delivers neutral grays, smooth gradations and natural skintones

#### Metallic Silver Ink

Produces over 500 striking metallic and pearlescent colors

\*Except select consumables and customer replacement items. Registration within 60 days and continuous exclusive use of Roland Inks during the first two years of ownership is required to qualify for the free second year of limited warranty coverage. Additional Terms and Conditions apply.

## SOLJET PRO 4 XR-640 INKJET PRINTER/CUTTER

- Large-format printer/cutter with 64" width
- Two mirrored print heads in inline configuration
- New high-definition, Eco-Sol MAX 2 ink (nickel-free, virtually no odor) available in 4 configurations:
  - > CMYK Lc Lm + Light Black
  - > CMYK Lc Lm White + Metallic
  - > CMYK Lc Lm Light Black + White
  - > CMYK Lc Lm Light Black + Metallic
- Prints 3 different-sized droplets from 7 sizes available
- Photorealistic printing up to 720 x 1440 dpi
- Roland Intelligent Pass Control Technology
- Print speeds of up to 528 sq. ft. per hour (49 m<sup>2</sup>/h)
- Automated ink circulation system reduces ink waste
- Prints on both uncoated & coated media
- Up to three years outdoor durability without lamination\*
- Integrated contour cutting with Quadralign™ registration
- Media handling system supports rolls up to 88 lbs. (40 kg)
- Automated take-up system included
- Integrated tri-heater (optional dryer system available)
- Includes Roland VersaWorks RIP software
  - > Easy-to-use Graphical User Interface
  - > Roland Color System
  - > Variable Data Printing
  - > Built-in PANTONE® spot color library
- Two-Year Trouble-Free Warranty Gold Edition\*\* on parts and labor including 2 free preventative maintenance visits
- Advanced X-Rite color management tools available
- Roland OnSupport™ enables remote tracking of production status with automated e-mail notifications

Shown with optional DU-640 Heater/Blower
